How One Business Pays For Home Turnaround Parties

Inspiring Business Start-ups & Helping Job Seekers — For Free.

Editor's Summary

- Over 31 million people are out of work or under-employed — according to the Bureau of Labor Statistics (BLS.GOV).
- Small businesses generate 65-80% of all jobs. Home Turnaround Parties enhance the guest's knowledge about funding and contracts in business. Job seekers get the largest number of clickable jobs banks in the world. All free.

ATLANTIC NORTHEAST — February 15, 2010 — If you take the more than 31 million people out of work and either help them find a job or start a business, new jobs will be the result, right? Maybe for 10%. Add everything needed to succeed (training and tools) for \$39 per year and success will increase dramatically.

Our tax dollars have always paid an almost incomprehensible amount to American contractors for every service and product made. Further, the federal government mandates that 24% of contracts be won by Small Businesses. The also stipulate that X-percent of contracts be awarded to minorities (women-owned, Asian, African American, etc.).

Giving away books-with-links, resources, interactive job-banks and Turnaround Party-Kits, ByTonight.com may help some with more income, and others by making their new business startup success possible.
